

ABOUT US

More than just instructors, we at EduVenturous Academy are future success catalysts. To provide kids with the skills they need for the modern world, our team is committed to fostering an environment where education is an adventurous journey.

In our ideal future, education will provide a thorough grounding for a technologically and creatively oriented society, rather than merely imparting knowledge. Beyond coding, we emphasise soft skills that are critical to both career and personal sustainability.

EduVenturous

Coding for All:
EMPOWERING
BRILLIANT MINDS

OUR PROGRAM BENEFITS

- 1. Structured Learning:
Comfortable, organized coding classes tailored for all types of learners.
- 2. Problem-Solving Skills:
Coding challenges stimulate critical thinking and enhance problem-solving skills.
- 3. Creative Expression:
Coding as a canvas for creative expression through graphics and animations.
- 4. Focused Engagement:
Absorbing coding activities aligned with individual passions for sustained attention.
- 5. Social Interaction:
Collaborative coding projects foster teamwork and social skills in a supportive setting.
- 6. Tangible Achievement:
Coding projects boost confidence and provide a sense of accomplishment.

"TRANSFORM YOUR CHILD'S POTENTIAL WITH EDUVENTUROUS ACADEMY, WHERE CODING BRINGS OUT UNIQUE STRENGTHS IN A SUPPORTIVE AND INCLUSIVE SPACE."

- 7. Consistent Feedback:
Immediate and consistent feedback in coding environments for predictability.
- 8. Career Skills:
Early exposure to coding imparts skills aligned with future technology careers.
- 9. Digital Citizenship:
Teaching responsible digital citizenship and essential online skills for safe internet practices.

Our Program

BASIC COURSES

EduVenturous Academy's basic programming courses emphasize foundational coding. These two courses, "Pre-Coding" and "Scratch Junior," cater to children new to fundamental coding concepts, offering an introduction to programming principles.

200 USD PER MONTH

INTERMEDIATE COURSES

As students graduate from the foundational programming courses, they transition to the Intermediate Programming series. This stage delves into advanced block-based programming across three comprehensive levels, featuring engaging platforms like Scratch, micro:bit, and App Inventor.

235 USD PER MONTH

ADVANCED COURSES

Crafted for teenagers, our Advanced Programming Courses encompass Python, web design, game development, and beyond. This thorough series, meticulously designed for triumph in the dynamic tech realm, features three modules for profound expertise.

280 USD PER MONTH

EduVenturous Academy provides personalized online coding programs for kids and teenagers, spanning from foundational to advanced stages. Beginning with essential concepts, participants advance through intermediate to advanced subjects, readying them for coding careers or further education.

Where Education Becomes
an Adventurous Journey

www.eduventurus.com

**"Everyone in this country
should learn how to program
because it teaches you how to
think"**

STEVE JOBS

Our Vision

We envision a future where education is not just about knowledge but a comprehensive preparation for a world driven by technology and creativity. Our focus extends beyond coding, emphasizing essential soft skills that are vital for personal and professional sustainability.

Free Placement Session

Explore your coding level with a free session! Click 'Book a Session,' choose your time, and fill out a form. Our team will guide you and recommend courses tailored to your skills. Embark on your coding adventure at EduVenturous Academy.
